Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- **Rating Symbols** suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- **Content Descriptors** indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.

GAME CONTROLS

Xbox 360® Controller

Note: Other control setups are available via the Options menu.

MAIN MENU

Choose between the Story, Special Ops and Multiplayer Modern Warfare® 2 experience, as well as view your completion percentages for each mode.

CAMPAIGN

Pick up where *Call of Duty®4: Modern Warfare®* ended and continue the single player experience in the *Modern Warfare®2* campaign. From the Story menu you can resume your most recent campaign or start a new one. You may also use the **Mission Select** option to replay an already completed mission at any difficulty.

*Note: Modern Warfare® 2 uses an automatic checkpoint save system to save your game progress. You may also choose to use the **Save and Quit** option from the in-game Pause menu.*

SPECIAL OPS

Take on a variety of custom-designed challenging missions in Special Ops—solo or with a friend. Experience co-op play in Special Ops locally in Split-Screen mode, or remotely online. You can also use this menu to revisit any unlocked Special Ops mission and attempt to complete it on one of three difficulties.

MULTIPLAYER

Compete with other *Modern Warfare®2* players online and locally in a variety of maps and game modes in Multiplayer (MP). Unlock new weapons, attachments, perks and rank up in MP!

- 3. Inventory** – Displays devices and/or weapon attachments that are currently available.
- 4. Grenade Indicator** – Icon warning you that there is a grenade nearby, arrow indicates the location of the grenade.
- 5. Damage Indicator** – Red marker shows that you are taking damage and the direction the damage is coming from. (See Health System, below)
- 6. Use Icon** – This only appears when you are near a weapon or interactive object, indicates what button to press to interact with the weapon or object.
- 7. Ammo Count** – Shows remaining bullets for currently equipped weapon, as well as remaining grenade supplies.
- 8. Match Info** – Displays current score, team icon and time remaining in match. (MP Only)

- 10. XP Bar** – Shows progress on your current rank in MP. (MP Only)
- 11. Crosshair** – Indicates where you are currently pointing your weapon. Turns red when positioned over an enemy, green when positioned over a friendly. Walking or running causes the crosshair to grow wider or sometimes disappear altogether, indicating a loss of accuracy. Stopping movement, crouching and going prone increase accuracy.*

**Note: When you press the ADS button, you will aim down the sights or scope of your weapon. This will greatly increase your accuracy and decrease your movement speed. While in ADS the crosshair will disappear.*
