LINKING YOUR GAMERTAG TO AN EA/ORIGIN ACCOUNT

Once you're connected to Xbox LIVE your gamertag acts as your gamer profile, a unique on-screen player identifier separating you from the rest of the field. Your gamertag can also be linked to your EA/Origin Account enabling you to participate in message board discussions, seek technical support, view game stats, and much more.

- ▶ **If you don't have an EA/Origin Account** and have not gone online with an EA title using your gamertag, you must create an EA/Origin Account from the EA/Origin Online Account Creation screen. The information entered will link your gamertag to an EA/Origin Account (which can then be used to access any supported game features on the web (e.g., www.easports.com). Once these details have been accepted it can't be changed, so be sure to make a note of it.
- ▶ **If you already have an EA/Origin Account** created from www.origin.com but have yet to link your gamertag or gone online using your gamer profile with an EA title, you will be prompted to enter your EA/Origin Account details on the EA/Origin Online Account Creation screen. Entering your EA/Origin Account details links your gamertag to this account. Please make sure that you use the same email address used to create your online entitlement (i.e., your gamertag).
- ▶ You can also manage and update your account information, retrieve lost passwords, and view your currently linked Personas from the Console Personas section of your main profile page at <http://www.origin.com/profile>.

Note: If you've already created an EA/Origin Account, your login is normally your email address.

Important Health Warning About Playing Video Games

Photosensitive seizures

A very small percentage of people may experience a seizure when exposed to certain visual images, including flashing lights or patterns that may appear in video games. Even people who have no history of seizures or epilepsy may have an undiagnosed condition that can cause these "photosensitive epileptic seizures" while watching video games.

These seizures may have a variety of symptoms, including lightheadedness, altered vision, eye or face twitching, jerking or shaking of arms or legs, disorientation, confusion, or momentary loss of awareness. Seizures may also cause loss of consciousness or convulsions that can lead to injury from falling down or striking nearby objects.

Immediately stop playing and consult a doctor if you experience any of these symptoms. Parents should watch for or ask their children about the above symptoms—children and teenagers are more likely than adults to experience these seizures. The risk of photosensitive epileptic seizures may be reduced by taking the following precautions: Sit farther from the screen; use a smaller screen; play in a well-lit room; do not play when you are drowsy or fatigued.

If you or any of your relatives have a history of seizures or epilepsy, consult a doctor before playing.

ESRB Game Ratings

The Entertainment Software Rating Board (ESRB) ratings are designed to provide consumers, especially parents, with concise, impartial guidance about the age-appropriateness and content of computer and video games. This information can help consumers make informed purchase decisions about which games they deem suitable for their children and families.

ESRB ratings have two equal parts:

- **Rating Symbols** suggest age appropriateness for the game. These symbols appear on the front of virtually every game box available for retail sale or rental in the United States and Canada.
- **Content Descriptors** indicate elements in a game that may have triggered a particular rating and/or may be of interest or concern. The descriptors appear on the back of the box next to the rating symbol.
